Infotainment Gateway - High-Level Design

---

1. Component Overview

This document describes the Infotainment Gateway responsible for bridging in-vehicle network signals to the infotainment
Software Components

Component: ComGatewayComponent
Component: MediaPlayerComponent
Component: DiagnosticManagerComponent

2. Interfaces and Ports

Interface: ComGatewayInterface
Interface: MediaControlInterface
PPort: ComGateway_PPort
RPort: MediaPlayer_RPort
ComGatewayComponent provides ComGatewayInterface via ComGateway_PPort. MediaPlayerComponent requires Med

3. Signals

Signal: VehicleSpeed_Signal
Signal: MediaPlayState_Signal
Signal: DiagnosticTroubleCode_Signal

4. Dependencies

MediaPlayerComponent depends on ComGatewayComponent for vehicle speed data used to restrict video playback while

5. Functional Flow

ComGatewayComponent relays VehicleSpeed_Signal from the vehicle network to the infotainment domain. MediaPlayerC
